

Amendments to the Specification

Please replace the paragraph that begins on Page 45, line 21 and carries over to Page 46, line 11 with the following marked-up replacement paragraph:

al -- Commonly-assigned U. S. Patents 6,633,761 (serial Patents (serial number 09/637,742, filed 8/11/2000) and (serial and 6,691,227 (serial number 09/657,745, filed 9/08/2000), which are titled "Enabling Seamless User Mobility in a Short-Range Wireless Networking Environment" and "Location-Independent Packet Routing and Secure Access in a Short-Range Wireless Networking Environment", respectively, deal with providing seamless network connectivity by having access points coordinate with a core server to perform various functions and with providing transparent address translation as a client device roams through a short-range wireless networking environment. The network control server functionality described in the present invention may be co-located with either, or both, the core server and the routing table coordinator of these commonly-assigned inventions. --
